4 Application for Doctoral Studies

Step by step to your doctorate!
The application for a doctoral program differs in some points compared to applications for bachelor’s, master’s or German language course programs. For this reason, the following chapters contain step-by-step instructions to make your application easier.

4.1 Step 1: How do I find a suitable topic and a supervisor?

The doctoral program is based on independent research under the supervision of a professor.

Please note! You are independently responsible for finding a topic and a supervisor. The CAU does not offer lists with contact details of supervisors. We recommend that you first select a subject area and then find out about doctoral opportunities on the websites of the respective faculties at https://www.uni-kiel.de/de/universitaet/einrichtungen-fakultaeten/fakultaeten-gemeinsame-einrichtungen/.

Please also find out whether further qualifications are required by the respective faculty.

Please note that even if you fulfill all requirements you are not guaranteed a place in the doctoral program. The professors are not obliged to accept your application.

In the German Academic Exchange Service (DAAD) portal you will find further advertisements for doctoral positions in Germany: www.daad.de/deutschland/promotion/phd/de.

Doctoral studies can last from two to six years, depending on the subject area, research topic and previous education.

4.2 Step 2: What requirements do I need to fulfill?

First of all, it is important to find out which general requirements you have to meet in order to apply for a doctoral program. All applicants need:

- proof of a completed master's degree or a comparable degree
Please note! If you have a foreign university degree, you can generally study in Germany. However, your degree must be equivalent to a German university degree. Your documents will be checked in consultation with your supervisor.

4.3 Step 3: How do I proceed once I have found a supervisor?

You must first register with the Graduate Center as well as at the Dean's Office and be put on the list of doctoral candidates.

You can then decide whether you wish to be enrolled by the CAU or not. Enrollment is not obligatory for doctoral students. Nevertheless, by enrolling, you can take advantage of all the benefits of student status (e.g. discounted sports facilities, cafeteria facilities, statewide semester ticket, etc...).

If you would like to be enrolled as a student at the CAU, please send us the following documents:

- Application for enrolment
- Application to the doctoral program
- School leaving certificate
- University or college degree with subjects
- Overview of subjects with grades "Transcript of records"
- Curriculum vitae
- Copy of your passport (page with data and photo)

Please see 6.1 for the registration fees.

If you decide not to enroll, you do not need to do anything else at this point.

Scholarships and grants are offered by organizations such as the DAAD:
www.daad.de/deutschland/stipendium
An overview of funding opportunities for doctoral students and current research grants at Kiel University can be found on the Graduate Center website: https://www.graduiertenzentrum.uni-kiel.de/en/stipends?set_language=en
4.4 Step 4: Who do I contact if I still have questions?

If you have any further questions, please feel free to contact our staff by e-mail, telephone or during our office hours.

Please note!

- Please note that we can only answer questions about the general application process. If you have any questions regarding your topic, please contact the respective faculty or your supervisor.

- We also ask you to read the application information carefully and to avoid questions which can be answered with the help of this information. In this way, you will contribute to the prompt answering of important, individual questions by our employees.
